The artist Kevin Cole folds, bends and layers metal and other materials to create his three-dimensional constructions. **How can you use these techniques to turn flat, two-dimensional paper into a sculpture inspired by his art?**

**KEVIN COLE PAPER SCULPTURES**

For this activity you will need:

- scissors
- paper
- glue or tape

If your paper doesn’t have designs or color on it, you can add your own with pencils, markers or crayons.

**To make your sculpture:**

1. Choose a piece of paper for your sculpture base
2. Cut other pieces of paper into strips
3. Twist, curl and bend your paper strips into shapes
4. Glue the ends of the strips to your base
5. Try layering your paper designs so you fill your entire base. What kind of shapes can you make? How high can your sculpture reach?
