APPLE COLLAGE

In the spirit of heading back to school, we’re taking inspiration from Henry Ossawa Tanner’s still-life painting of apples.

Collage Instructions:

1. Print out or draw an outline of an apple. Make it as big as you can.

2. Decide what color your apple will be. Find that color in old magazines and cut it out. Collect as many pieces as you can find of all shades, shapes and sizes.

3. Fill in the apple outline by gluing down your colored pieces. It is okay if they overlap.

4. Cut out a brown paper stem for the apple and glue it on the top. Cut out the apple and give it to your favorite teacher!

For this activity you will need:

- brown scrap paper
- scissors
- a printed apple template found online or a blank piece of paper
- old magazines
- glue
